Introduction:

RCS helps you send rich contextually relevant content directly to your customer's Messages app on Android. RCS messaging is designed to move mobile networks beyond texting. Now with RCS, share high-res photos and larger files, chat with a group,

know when messages are read, & build a relationship with users.

1.Accessing RCS Messaging Through MOBtexting Platform

To get started with accessing the application, follow the steps below:

Step 1: In your browser, type in the URL: https://portal.mobtexting.com/rcs

Step 2: Enter the username and password to log in

Step 3: Click on the Sign-in button

2.Access for the new user

Visit https://www.mobtexting.com

Click on Sign-Up at the top of the page.

Fill up all the required fields. Please provide a valid email address as we verify it.

3. MOBtexting, RCS Dashboard

Now you can use the RCS messaging through MOBtexting platform. Here the RCS messaging Dashboard looks like in the MOBtexting panel.

4. Requirements at User End to receive RCS messages.

- RCS messages can only be send to Android devices
- · Google message app should installed in the android phone
- In the Google messages application, chat settings should be enabled

5. Register as an Agent In MOBtexting platform

Your MOBtexting account manager helps you to get the RCS agent registration done MOBtexting account manager will collect a few documents from your end and get it approved as a RCS agent from Google.

Once the Agent is created, you can see the record in the Agents section.

6. Template

This is completely owned by Google so there is no need of DLT template approval in RCS messaging. So you can setup campaign directly once the agent is created.

7. Send Campaign

Click on the campaign manager to create a new campaign. As there is need of template approval from, you can directly enter the message, you wish to send.
